

Aerial Squares AE310, AE312

Interface®

A view from above gives us the unique opportunity to witness connectivity. The web of connections fascinates and assures us. In Aerial, a simple neutral palette travels new paths when several hues are tangled together for each colourway. The way the shades shift in seemingly endless movements from one tile to the next is provocative and stirs attention.

The construction of AE310 recalls the warp and weft of a hand-woven textile. AE312 adds strands of colour to light up that texture. The Aerial squares fit together effortlessly with the rest of the collection, creating a network of design possibilities to trace and discover.

Production specifications are subject to normal manufacturing tolerances and may be changed without notice. Slight variation in colour among different production lots are normal and should be considered in the overall installation plan. Products covered by manufacturer's written warranty only. All other warranties, including without limitation any implied warranties of merchantability or fitness for particular purpose, are hereby disclaimed. Contact your representative for written warranty information. Recycled content calculations are based on historical averages by total weight of the product for backings. Yarn/Fibre recycled content calculation excludes backing. We update our recycled content information and other environmental data regularly to reflect changes and advancements in our technology.
 *Cool Carpet is not a standard option in Australia and New Zealand.

As part of Interface's Mission Zero promise to eliminate any negative impact on the environment by 2020, we always consider the environment impact of every creative, manufacturing and building decision. This sample book is printed on recycled paper and with soy based ink. Twenty four virgin trees were saved from our use of 1725kg of recycled paper in the production of 5000 sample books. Energy intensity also decreased and greenhouse gases were reduced. The other reductions came from waste water and solid waste. Through our sample reclamation program, we help keep sample materials out of landfill by re-using them until it is time to recycle these sample materials.
